CENTRE FOR CONSERVATIVE AND OPERATIVE ORTHOPAEDICS

# WHAT COUNTS FOR US IS THE PATIENT. YOU!

All our efforts revolve around you as a patient. With our concept of individual care and interdisciplinary cooperation over short distances, we hope to offer a quality of treatment and care that meets the highest requirements.

Our goal is to provide holistic and personal treatment and top-quality medical care.

A highly diversified team of specialists awaits you at our centre for conservative and operative orthopaedics. Be it conservative procedures, modern, minimally-invasive surgery, gentle anaesthetic methods, effective pain therapies, or individual aftercare – everything will be combined in a treatment concept that is tailor-made for you.

## The 4 Pillars of our Philosophy

- Holistic treatment – from diagnosis to rehabilitation
- Medical competence through teamwork and specialization
- Top service and pleasant ambience
- The latest surgical techniques, treatment processes and training methods

# HOLISTICALLY SPECIALIZED APPROACH AND TREATMENT.

Everyone in the entire team of Hessingpark-Clinic – from the physicians via the medical assistants, service personnel and functional staff through to the therapists and sports scientists of Hessingpark-Clinic Therapy and Training – is available to you as a competent point of contact during your stay. We think that individual care also includes keeping the patient informed. Our

medical approach is based on orthopaedic care and treatment under holistic principles.

The high medical quality achieved at Hessingpark-Clinic is the result of teamwork and rigorous specialization, continuous learning and training, as well as an intensive international exchange of experiences.

## Range of Medical Services

- Diagnostics
- Conservative orthopaedics
- Minimally invasive surgery
- Semi-invasive procedures
- Joint replacements
- Osteology
- Prevention and rehabilitation
- Rheumatology

**Peter Munding M.D.**  
Specialist for Radiology,  
Neuroradiology

Special fields:  
Musculoskeletal radiology, neuroradiology

**Wolfgang Fischer M.D.**  
Specialist for Radiology

The Hessianpark-Clinic radiology team aims to provide optimum diagnostic radiology with the aid of state-of-the-art technology as well as a personal service. One of the key magnetic resonance imaging (MRI) techniques our clinic offers is high-resolution spin-polarized scanning electron microscopy, which also supplies detailed images of small joints that cannot be obtained with ordinary MRI.

# CARE AND PATIENT SERVICES

**Theresia Rodler**

Head of Care Service,  
Quality Management

**Brigitte Hübner**

Head of Outpatient Care,  
Patient Service

## RELAXED RECOVERY.

The architecture of Hessingpark-Clinic captivates with timeless airiness and its focus on the essentials. It is bright and light-flooded, the furnishings "superior" in every respect. And the distances are short and manageable. A friendly atmosphere and pleasant ambience stimulate the body's self-healing powers and relax the soul. At Hessingpark-Clinic, you are meant to feel welcome as a guest.

Our quiet single and double rooms have a terrace of their own and a sophisticated design. They convince by aesthetic functionality and offer every comfort. Modern entertainment and

communication media are available. Every room is equipped with internet access.

You can relax or receive your visitors in our lounge on the first floor or in the "Bistro" on the third.

The à la carte menu can be served in the room as well as in the Clinic's Bistro. The bill of fare features set menus that are changed every day and preferably prepared with home-grown ingredients. It goes without saying that all special dietetic, religious or ethical requests will be catered to.

## STRIVING FOR PERFECTION.

At HP-C, individual treatment stages are based on the latest scientific findings and individually adapted. This is done in close coordination between the physicians, therapists and you, of course.

Our highly modern magnetic resonance scanner and digital X-ray system of the latest generation enable us to work on a level of diagnostic detail not found in many comparable institutions. This makes planning the therapy easier and therefore improves the success chances.

Even during your stay as an in-patient, you will be looked after by the physiotherapists and sports scientists from Hessianpark-Clinic Therapy and Training. This institute enables us to offer physiotherapy and medically based health training for prevention and rehabilitation in keeping with our quality standards.

A practice for natural medicine and osteopathy rounds off our holistically oriented treatment spectrum.

... A CLINIC THAT WELCOMES PATIENTS AS GUESTS.

The services offered by Hessingpark-Clinic GmbH and the physicians working there in their own office are not covered by health care agreements with statutory health insurance bodies. The latter will hence not normally meet the costs of treatments at Hessingpark-Clinic. Cost defrayal issues should be clarified with the respective insurer before starting a treatment.
